Brian,

You can view High Resolution Orthoimagery back to 2005 for your location via the USGS EarthExplorer: <https://earthexplorer.usgs.gov/>

Enter 3950 S. Pennsylvania Ave., St. Francis, WI in the Address/Place search box → Click Show
→ Click on the linked Address/Place

Then, in the Data Sets tab, expand Aerial Photography and chose those sets. Then click on Results. Choose High Resolution Orthoimagery from the drop-down menu. You can also choose to view other data sets via the drop-own menu. There are earlier maps available in other sets. You can read more about the available data sets here: https://lta.cr.usgs.gov/products_overview

I hope this helps.

Karen
